With all the new Food laws and requirements, it is easy to lose sight of what are the reasons behind the regulatory framework, Food Safety. In this workshop, ASQ and FDA collaborated to present the 2nd Dietary Supplement Consortium on current and relevant FSMA/FSVP/FDA changes, new regulations both local and international, and stay abreast with industry initiatives and trends. The goals are to gain knowledge from the FDA and industry experts, provide a venue to network, discuss government and industry issues, get involved, and learn from best practices to ensure quality and compliance with Dietary Supplement and Food Safety Regulations.
